

Sway Community Speed Watch report as of 15/11/2016

Sway Parish Council website has a page devoted to Community SpeedWatch where many of the latest statistics are published, so this report should be read in conjunction with the web page at <http://www.sway-pc.gov.uk/csw> .

In early November we performed eight 60 minute surveys, just three quarters of last month's. The total number of vehicles surveyed was 60% of last month's. These reductions are partly the result of a lack of available volunteers, and partly a natural result of the earlier evenings preventing us from surveying during the evening rush hour.

We have sent details of 102 vehicles for PNC checking and processing. No vehicles exceeded 50mph which was a very welcome change.

Feedback from the police:

- Number failed PNC (with reasons if possible) = 3
1 – PNC mismatch, 1 - No Trace, 1 - No Current Owner
- Number of letters sent = Letter 1 - 81, Letter 2 - 16
- Number escalated and reasons = 2 multiple offences

This time we did not see the excessive speeding along Pitmore Lane South so hopefully that was an anomaly and we hope to downgrade its status next month.

The main stats for early November are:

Date	Time	Location	Vehicles reported to Police	Total Vehicles recorded	Maximum Speed	Number exceeding 35mph	%
31/10/2016	15:15-16:15	ArnewoodN	19	185	44	36	19%
01/11/2016	15:15-16:15	BrightonS	8	77	38	13	17%
02/11/2016	15:15-16:15	PitmoreM	4	163	39	8	5%
03/11/2016	08:30-09:30	PitmoreN	0	139	34	0	0%
03/11/2016	15:15-16:15	PitmoreS	17	187	42	29	16%
04/11/2016	08:30-09:30	ArnewoodN	32	209	42	54	26%
04/11/2016	15:15-16:15	DurnstownS	9	209	42	12	6%
05/11/2016	08:30-09:30	DurnstownN	13	148	46	14	9%
Overall	8 hours		102	1317	46	166	13%

Statistics since we began in 2014 can be viewed at <http://www.sway-pc.gov.uk/csw>

These charts show how the percentages of vehicles speeding at 35 mph or more have changed since we began collecting SID stats in July 2014.

The trend lines have been changed to 8 session rolling average trends, giving a truer picture of any improvement or otherwise in the the statistics.

Arnewood Bridge Road is still our most severe problem area. One in every 3 motorists drive at 35 mph or higher.

This location needs highest possible attention. CSW on its own is not sufficient.

Status RED

Durnstown remains broadly unchanged.

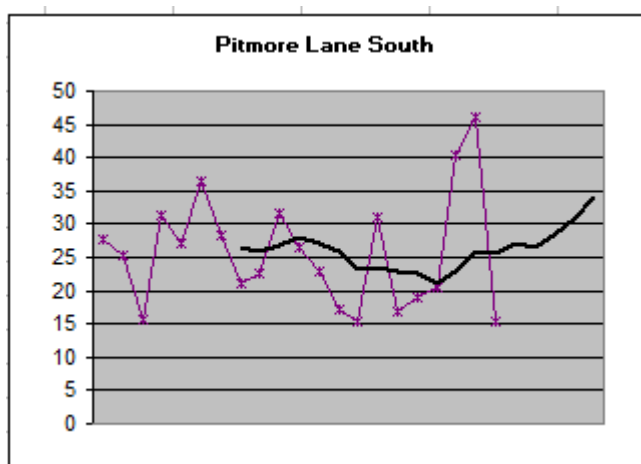

Status AMBER

Brighton Road previous signs of improvement appear to have stopped so its status cannot yet be changed.

Status AMBER

Since we conduct SpeedWatch surveys at three distinct locations on Pitmore Lane, each having different characteristics, the results from them are now shown on separate graphs.

Pitmore Lane South suddenly and dramatically worsened over the past 2 months but this time has reverted to "normal". If next month's results show this improvement we will be able to change it status back to amber. But until then -

Status RED

Pitmore Lane Middle still shows little sign of improvement although this month numbers were quite low.

Status AMBER

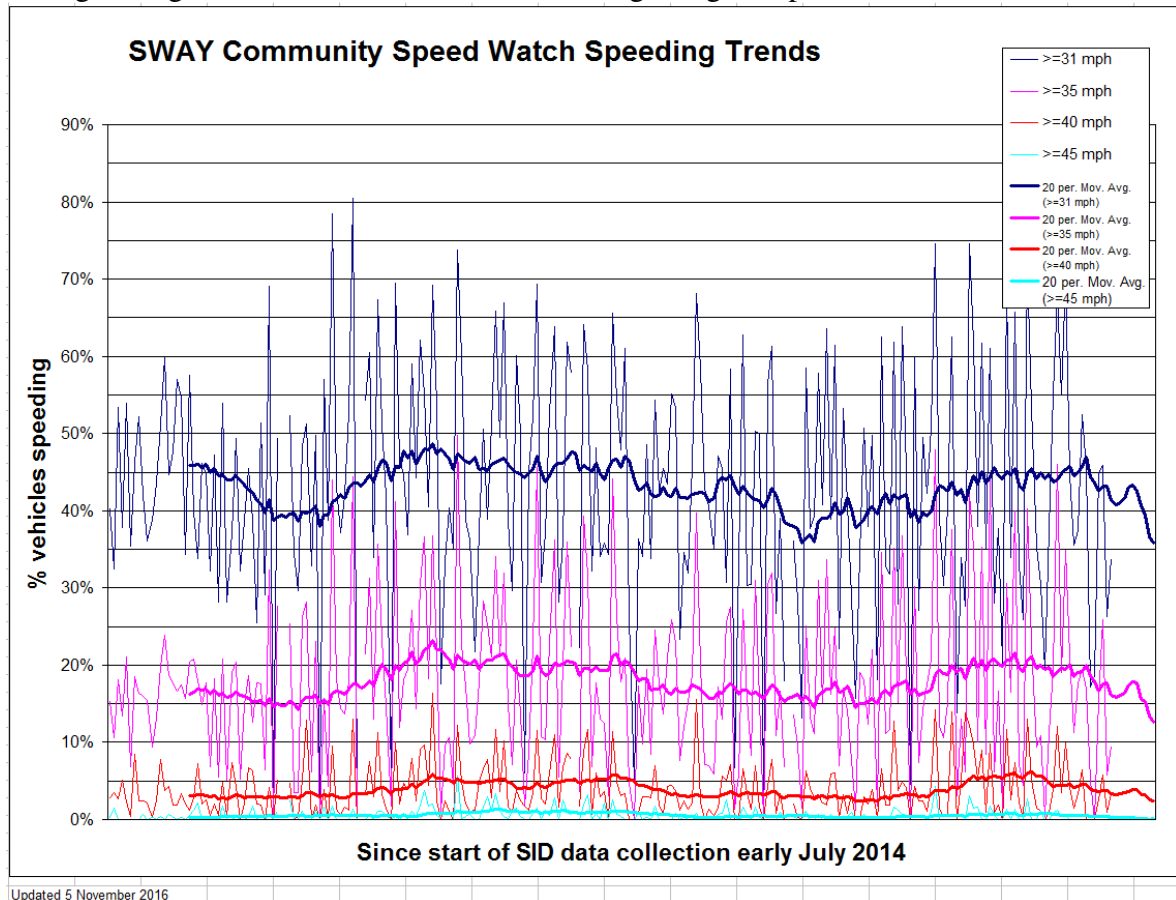

Pitmore Lane North continues to be our one true success story. This location on open forest has shown tremendous improvement. Maybe it is a combination of SpeedWatch and other factors such as the potential presence of animals on the road and the regular deployment of the Verderer funded mobile speed camera. If so, this may well demonstrate how SpeedWatch needs additional measures in order to be truly effective.

Status GREEN

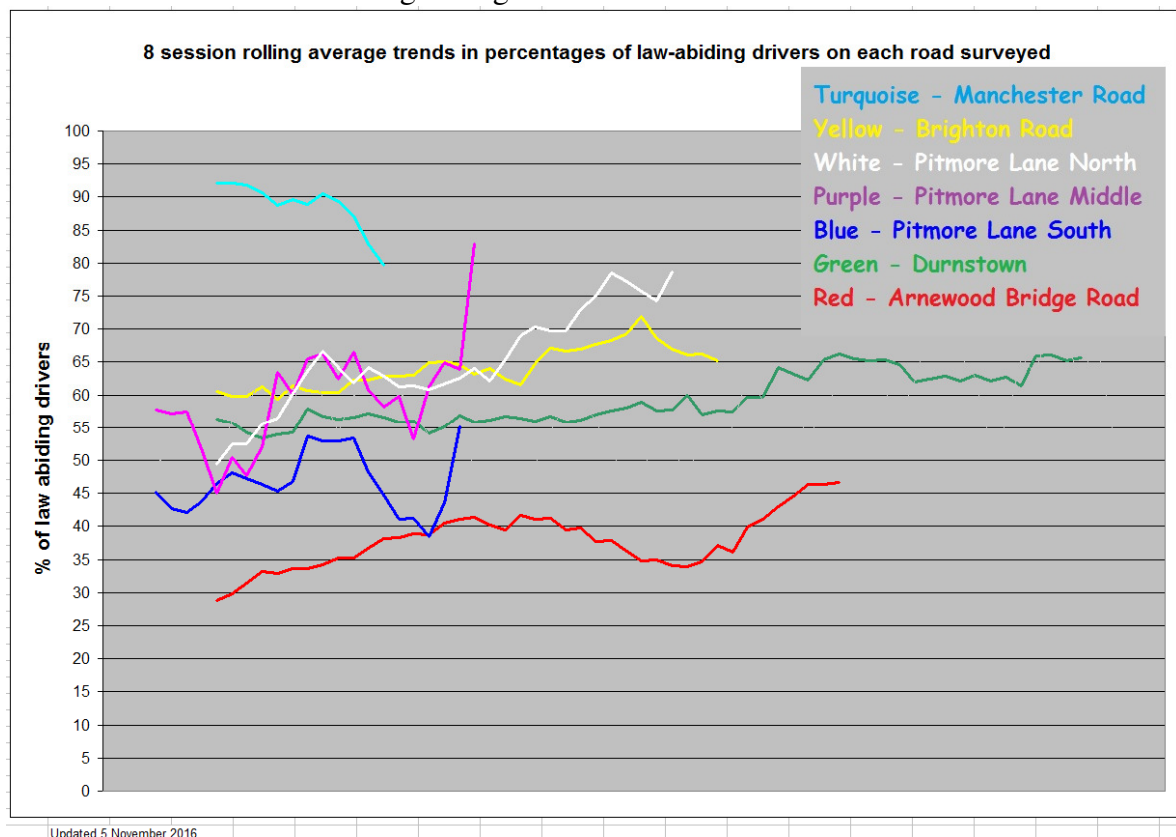

Manchester Road is perceived to be a problem area by residents. Our 12 surveys there so far have recorded just thirteen motorists exceeding 35mph. However, the chart showing the percentages of law abiding drivers (on the website) suggests that the situation on Manchester Road is beginning to deteriorate towards that seen at our other survey locations.

Charts from website for those without internet access

Overall Speeding Trends. Does not take into account location. Trend lines are 20 session rolling averages. The trend lines are now showing a slight improvement.

Trends in percentages of drivers obeying the speed limit on each of the roads surveyed. Trend lines are 4 session rolling averages. Here we **do** want the lines to rise!

Quite Interesting statistics since we began Community Speed Watch in April 2014.

Week beginning	Number of Session Hours	Volunteer hours at roadside	Speeding Vehicles recorded by volunteers	Number of letters sent out by police	Data Extracted from Speed Indicator Device						Maximum Speed Recorded	Total Volunteer hours
					Total Vehicles Surveyed (passing)	Vehicles exceeding 30 mph	% Vehicles exceeding 30 mph	Vehicles exceeding 35 mph	% Vehicles exceeding 35 mph
